SYEDA UMM E ABIHA RIZVI

Karachi, Pakistan | + (92) 3132140393 | syda.ummeabiha@gmail.com | LinkedIn | GitHub

SUMMARY

Software Engineer with 2 years of experience building scalable .NET applications using C#, ASP.NET Core, EF Core, and SQL Server. Experienced in delivering high-availability enterprise systems and resolving complex production challenges. Passionate about building intelligent .NET applications by integrating AI into modern software solutions.

SKILLS AND EXPERTISE

Backend	C#, .NET Core 6/8, ASP.NET Core, Web API, LINQ, T-SQL, Dapper, EF Core, ADO.NET
Frontend	Blazor WebAssembly, .NET MAUI, JavaScript, jQuery, React, HTML, CSS.
Databases	SQL Server, Sybase, PostgreSQL, MySQL, SQLite, MongoDB.
Cloud & DevOps	Azure (Key Vault, Blob Storage), AWS (S3 Buckets), Azure DevOps, Git, GitHub, Bitbucket.
Architecture	Microservices, MVC, REST APIs, Onion Architecture, Layered Architecture, Design Patterns.

PROFESSIONAL EXPERIENCE

Software Engineer @ Think Digitally | Aug 2025 - Present

- Delivered and maintained production features for RSS (self-storage) and PEEQ (performance management) platforms using ASP.NET MVC, Entity Framework Core, Dapper, Sybase, and SQL Server.
- Resolved production issues across API and database layers, improving platform stability and user experience.

Associate Software Engineer @ Turf Tech | Aug 2024 - July 2025

- Developed backend services for microservices-based Admin, POS, and Restaurant Management platforms for Aga Khan University Hospital using ASP.NET Core, Entity Framework Core, and .NET MAUI.
- Engineered end-to-end payment and reconciliation workflows integrating POS terminals, FBR, and SRB systems, supporting 10k+ daily transactions with 99.9% availability.
- Optimized LINQ queries and Entity Framework Core interactions to improve query performance.
- Integrated POS card readers for seamless real-time payment processing.

Software Engineering Intern @ Virtuosoft Private Limited | Mar 2024 - July 2024

- Contributed to migrating AMAX Insurance Pro from VB.NET to ASP.NET Core, implementing Onion Architecture to improve maintainability and scalability.
- Automated regional PSP data processing for Colgate using Quartz.NET jobs, eliminating a manual daily process.

Industrial Collaboration @ Lineax LLC | Oct 2023 - Jan 2024

- Built a NLP-powered recruitment platform with resume parsing and ranking, to accelerate candidate screening.

EDUCATION

National University of Computer and Emerging Sciences (FAST - NUCES) | Aug 2026 - Present

- Masters of Science (MS) in Artificial Intelligence.

NED University of Engineering and Technology | Oct 2021 - June 2025

- Bachelors of Engineering (BE) in Software Engineering, **CGPA: 3.787/4.00**

FINAL YEAR DESIGN PROJECT

Automated Recruitment Intelligence & Analytics System (ARIAS)

- Accepted into the **10 PEARLS PAKISTAN** Mentorship Program to develop an AI-powered hiring automation platform integrating LLM-based resume analysis, candidate recommendations, email automation, and interview scheduling.
- Built AI/ML pipelines for automated candidate screening and ranking, enabling data-driven hiring decisions.

RESEARCH & PUBLICATIONS

- A Comparative Analysis on the Services Offered by Amazon Web Services and Microsoft Azure. DOI
- Exploring the Effectiveness of SARIMA and LSTM Models for Vegetable Price Prediction in Karachi, Pakistan. DOI

ADDITIONAL INFORMATION

Courses	Fundamentals of C# (10Pearls University), Advance OOP Analysis (10Pearls University), Intro to Frontend (Meta), HTML, CSS and JS for Developers (John Hopkins), Version Control (Meta).
Achievements	Research poster on Crop Classification accepted at University of Scotland conference.
